

Competence and Experience

FlowVision – Competence and Experience

We are a spin-off of E-T-A Elektrotechnische Apparate GmbH and can thus draw upon 40 years of experience. In working intensively with our customers we are able to solve demanding tasks in flow monitoring and velocity sensor technology. Protection of high-quality pumps and monitoring of cooling circuits are typical applications of our products. In addition we focus on detecting and monitoring valuable energy carriers such as compressed air. In times of expensive resources this helps you to exploit these media as effectively as possible.

The thermal measuring method of our products is ideally suited to cost-effective mass measurement of gases. The robust design of our flow monitors and meters provides ease of operation for all nominal widths.

Our products and solutions

FlowVision offers a wide range of products which are suitable for numerous applications requiring flow meters, flow monitors and velocity sensors.

We supply our products into the following applications:

- Food stuffs industry** | dairies, cheese dairies
- Energy supply** | power plant equipment, biogas measurement
- Automotive engineering** | special solutions for body-in-white, car paint, body work
- Commercial vehicles** | construction equipment and special machinery
- Buildings** | compressed air measurement, energy efficiency
- Chemical industry** | explosion protection up to zone 0

Do you have any queries or a specific application problem? We shall be pleased to be of assistance to you – please do not hesitate to get in touch.
