

Description

The miniature Flow Meter FC03 is designed to operate with air, compressed air, oxygen, nitrogen and biogas. With one analogue output, one frequency output or one flow limit value. Sensor head integral with electronic circuitry.

When used in a compressed-air system, the FC03 has to be installed behind the air dryer to prevent moisture condensation of the sensors. Damage of the ceramic sensors through particles in the pipe system must be prevented by suitable filtering measures.

Features

- Pressure resistant, $p_N = 16 \text{ bar}/232 \text{ psi}$
- Installation by sensor adapter TP-... or ball valve BV-...
- Connection by means of M8 connectors to IEC 60947-5-2
- Operating range factory preset
- Adjustable limit value
- No moving parts in the flow
- LED status indication
- Relay or analogue output
- Response time $< 1 \text{ s}$

Ordering information FC03

Type	
FC03	Miniature Flow Meter with 4-pole connector
Process connection	
11	Insertion-type (standard)
Material of the area exposed to medium	
M1	stainless steel 1.4571/AISI 316 Ti, polyamide/ceramics/ glass-passivated sealing
Length of shank	
L05	29.5 mm/1.16 in. (standard)
Electrical connection	
E08	IEC947 M8
Output	
C11	analogue output 4 - 20 mA
F1	frequency output 25 - 100 Hz
F2	frequency output 0 - 100 Hz
R1	1 relay output (1 MIN switching point)
Measuring range	
MB1	analogue output only
MB2	analogue or relay output

Sensor adapter TP.../Ball valve BV...

TP...

BV...

Features

- Correct positioning of sensor
- Ease of sensor replacement
- Measuring point can be closed if not used
- Sensor adapter available as screw-in or welding type
- Ball valve also serves as a shutoff valve (both input and output)

Accessories

Description	Ref. No.
Blanking plug, brass, with O ring	0Z121Z000186
Union nut, brass	Y 306 901 01

Union nut, stainless steel	Y 306 901 03

Welding set 05 (only usable with FC03...R1...)
0Z122Z000202

Description

Sensor adapters TP and ball valves BV facilitate correct positioning and exchange of CSP monitoring heads, FC03, FC04 or FS10-U1...11 (plug-in type connection) in pipes with process connection DN 15...DN 50. Ball valve BV enables pressure-free installation or removal of CSP monitoring heads, Flow Meter FC03, FC04 and Flow Monitor FS10-U1...11 (plug-in type connection) simply by closing the input and output pipe. The measuring points are suited to temporary measurements; after completion of the measuring cycle they can be closed by means of blanking plugs.

Cable type 21 with connectors

Description

Connection cable M8 for flow meter FC03 for connection of supply voltage and output signal.

Technical data

Cable type 21

Features: Protection degree IP67 (only with connector fitted)
Resistant to chemicals and oils

Temperature range: -25 °C ... +80 °C

Contact resistance: < 5 mΩ

Current carrying capacity: 4 A

Insulation resistance: > 10⁹ Ω

Withstand voltage: 1.5 kV_{rms}/60 s

Ordering information

Cable and cable connector
